

**All K**™  
0-0-25+17S

**All K** (0-0-25) is an excellent source of potassium for turf. The role potassium plays in sustaining vigorous plant growth through stressful conditions is well-documented. It is also well known that potassium is readily lost from the root zone through leaching, especially in sandy soils. **All K** provides potassium from potassium thiosulfate, a high quality, less caustic, chlorine-free source. **All K** is also an excellent source of sulfur.

**Benefits of Use**

- Excellent source of potassium
- Less caustic source of potassium
- Enhances stress tolerance
- Excellent source of sulfur

**Problem Conditions Improved**

- Low potassium levels in leached or sandy soils
- Stunted growth with necrotic leaf tips resulting from potassium deficiency
- Low vigor turf susceptible to mid-summer stresses

**GUARANTEED ANALYSIS**

Total Potassium (K)..... 25.00%  
 Combined Sulfur (S)..... 17.00%

**Derived From:** Potassium Thiosulfate

**Application Instructions:** One gallon of All K 0-0-25 contains 2.75 lbs. (1.25 kg) of Potassium.

**Physical Characteristics:** 11.00 lbs./gal.

Desired lbs. of K	Fl. oz. per 1000 s.f.*	Gallons per Acre**
0.10	4.7	1.6
0.125	5.8	2.0
0.25	11.6	4.0

\*Apply in 2.5-5 gal. water per 1000 s.f. \*\*Apply in 50-100 gal. water per Acre.
