

EnviroPro™

12-3-6

EnviroPro (12-3-6) is a premium grade fertilizer grade for full season nutrition of turfgrasses . It contains a 4-1-2 ratio of nitrogen, phosphorus and potassium for balance nutrition. The unique combination of phosphorus and organic acids not only sustains the availability of phosphorus, but improves the overall growth response of turf. This fertilizer is formulated for application through fertigation.

Benefits of Use

- Premium complete fertilizer with 4-1-2 ratio for full season nutrition
- Specially designed for application through fertigation
- Uniquely responsive organically complexed phosphorus source
- Especially effective during summer and fall seasons

Problem Conditions Improved

- Nutritional peaks and valleys
- Phosphorus deficiency symptoms
- Low nitrogen and/or potassium levels in leached soils
- Low levels of soil microbial activity
- Especially effective during spring and summer seasons
