

EnviroPro™

16-4-4

EnviroPro (16-4-4) is a premium grade fertilizer for spring and summer turf feeding. It contains a 4-1-1 ratio of nitrogen, phosphorus and potassium for use when growth stimulation is desired with moderate levels of phosphorus and potassium. The unique combination of phosphorus and organic acids not only sustains the availability of phosphorus, but improves the overall growth response of turf. This fertilizer is formulated for application through fertigation.

Benefits of Use

- Premium complete fertilizer with 4-1-1 ratio to promote turfgrass growth
- Specially designed for application through fertigation
- Uniquely responsive organically complexed phosphorus source
- Especially effective during spring and summer seasons

Problem Conditions Improved

- Nutritional peaks and valleys
- Phosphorus deficiency symptoms
- Low nitrogen and/or potassium levels in leached soils
- Low levels of soil microbial activity
- Poor spring and summer performance
