

Greenup PK™

0-9-20

Greenup K (0-9-25) is a premium grade fertilizer grade for use every day and grow-in situations where phosphorus and high levels of potassium are needed without nitrogen. The potassium is derived from potassium carbonate, a high quality, less caustic, chlorine-free source that is retained in the root zone longer for more uniform and consistent uptake by plants. It will help enhance environmental stress tolerance. In addition, it is particularly well suited for “co-injection” (fertigation) with a sole nitrogen source.

Benefits of Use

- Provides phosphorus and potassium without nitrogen
- Potassium remains plant available longer in soil
- Will enhance the performance of nitrogen fertilizers
- Specially designed for application through fertigation

Problem Conditions Improved

- Phosphorus and potassium deficiency symptoms
- Low potassium levels in soils susceptible to leaching
- Low vigor turf susceptible to environmental stresses
- Early season phosphorus deficiencies

GUARANTEED ANALYSIS

Available Phosphate (P₂O₅).. 9.00%

Soluble Potash (K₂O) 20.00%

Derived From: Phosphoric Acid, Potassium Carbonate

Physical Characteristics: 11.15 lbs./gal.

Application Instructions: One gallon (3.79 L) of Greenup PK contains 1 lbs. (0.45 Kg.) of phosphorus, and 2.23 lbs. (1.01 Kg.) of potash.

Physical Characteristics: 11.15 lbs./gal., pH 11.0

Desired lbs. of P ₂ O ₅	Fl. oz. per 1000 s.f.*	Gallons per Acre**
0.10	12.8	4.4
0.125	16.0	5.4
0.25	32.0	10.9
Desired lbs. of K ₂ O	Fl. oz. per 1000 s.f.*	Gallons per Acre**
0.10	5.7	2.0
0.125	7.2	2.4
0.25	14.4	4.9

*Apply in 2.5-5 gal. water per 1000 s.f. **Apply in 50-100 gal. water per Acre.
