

Nutralyz™ 12-0-0-26S

Nutralyz is a premium grade, clear liquid ammonium thiosulfate. As soil microorganisms break down and release the nitrogen and sulfur in Nutralyz, sulfuric acid is released into the soil. This release of sulfuric acid reduces the pH of alkaline soils. In addition to modifying soil pH, the sulfuric acid generated will break down bicarbonates and allow sodium to be flushed from the soil. As soil pH is reduced, micronutrients in the soil become more available for plant uptake.

Benefits of Use

- Reduces soil pH
- Reduces bicarbonate and sodium levels
- Helps improve micronutrient availability
- Excellent source of nitrogen and sulfur
- Reduces isolated dry spots caused by bicarbonate and sodium build-up
- Improves water and air penetration
- More even and deeper turf color

Problem Conditions Improved

- Sodium and bicarbonate toxicity symptoms
- Isolated dry spots
- Poor water penetration
- Poor fertilizer, particularly micronutrient performance

Guaranteed Analysis

Total Nitrogen (N)..... 12.00%
 12% Ammoniacal Nitrogen
 Combined Sulfur..... 26.00%

Derived From

Ammonium Thiosulfate.

Physical Characteristics

11.1 lb./gal. (1.32 lb. N and 2.86 lb. S/gal.);
 pH 9.0 +/- 0.5

Application Instructions

Corrective application: Apply 13 oz. per 1,000 sq.ft. (4.3 gallons per acre) for 3 consecutive weeks once every 2 months.

Preventative application: Apply 13 oz. per 1,000 sq.ft. (4.3 gallons per acre) every 4 to 6 weeks.

Container Sizes & Model Numbers

2.5 gal.	Model	57060
30 gal.	Model	57061
275 gal.	Model	57062

Handling & Storage

Store between 40-95° F. Avoid direct heat or fire. Decomposition may occur at high temperatures (above 225° F). Avoid Freezing!
 Keep out of reach of children. Harmful if swallowed. Avoid inhalation, eye contact, or ingestion. Avoid prolonged or repeated contact with skin which may cause irritation. Wash thoroughly after handling. Corrosive.
