

Silica

Silica is a formulation of silica and organic acids. The organic acids increase the availability and uptake of nutrients. Silica is known to be present in plant tissue of various species, but is not an essential nutrient. It is thought to increase leaf strength and rigidity in turf, and appears to increase wear tolerance, playability and disease resistance.

Benefits of Use

- Increased wear tolerance during heavy play
- Upright growth produces a more uniform putting surface

Problem Conditions Improved

- Heavy traffic resulting in reduced vigor

Guaranteed Analysis

Silica (Si)5.00%

Derived From

Sodium Silicate.

This product also contains organic acids and biostimulants derived from composting.

Physical Characteristics

9.4 lb./gal.; pH 11.5

Application Instructions

Apply 0.1 oz. per 1000 sq. ft. of turf in 2.5 gal. water. Mix with 0.4 oz. Multi-Purpose. This product should be used as a supplement to a regular fertility program. It will not by itself provide all the nutrients normally required by plants.

A pre-mix "Jar Test" is recommended to check compatibility of product combinations that have not been previously tested.

Shake well before using.

Container Sizes & Model Numbers

1 gal. Model 57676

Handling & Storage

Store between 40-95° F. Avoid direct heat or fire. Decomposition may occur at high temperatures (above 225° F). Avoid Freezing!

Keep out of reach of children. Harmful if swallowed. Avoid inhalation, eye contact, or ingestion. Avoid prolonged or repeated contact with skin which may cause irritation. Wash thoroughly after handling. Corrosive.
