

TurfPlex™ 20-2-3

TurfPlex™ 20-2-3 is a nitrogen source for heavily used turf areas. It contains micronutrients and organic acids derived from composting and biostimulants. Nitrogen is provided in plant-available forms that induce a rapid turf response and excellent color. Organic acids increase the availability and uptake of nutrients producing a more vigorous turf. TurfPlex 20-2-3 is an excellent product for spoon-feeding greens, tees, and other high traffic areas.

Benefits of Use

- Increases overall turf vigor
- Balanced nutrient blend and controlled release for sustained turf growth
- More consistent and sustained turf color
- Improves overall playability of golf turf
- Increases tolerance to multiple stresses
- Excellent product for fertigation

Problem Conditions Improved

- General lack of turf vigor
- Sandy soils with low CEC and water holding capacity
- Inconsistent turf growth due to excessive nutrient leaching
- Inconsistent turf color
