

Turf Special™

6-0-18

Turf Special (6-0-18) is a premium grade fertilizer for late season and other times when a high level of potassium versus nitrogen is desired. It contains a 1 to 3 ratio of nitrogen to potassium. Potassium has been reported to help increase turf stress tolerance. The potassium is derived from potassium carbonate which remains available in the soil longer than many other sources. This fertilizer is formulated for application through fertigation.

Benefits of Use

- Premium high potassium fertilizer with 1-0-3 ratio for late season nutrition
- Chelated iron and manganese for deep consistent color
- Helps promote stress tolerance
- Excellent potassium product for application through fertigation

Problem Conditions Improved

- Nutritional peaks and valleys
- Potassium deficiency symptoms
- Poor turf color
- Sands soils that do not hold potassium
- Severe environmental stress pressure
